For that reason they are used mainly as condiments, but have also applications for cosmetic and medicinal preparations. Most of these plants are perennial.

Aromatic crops are leaves and seeds of numerous plants with less strong flavoured substances than spices but largely used in the kitchen. Most of these plants are spontaneous (not cultivated).

5 Constructions and construction services

This section includes constructions and construction services. The former, in division 53, cover the physical outputs of construction activities (e.g., buildings or civil engineering works), while the latter, in division 54, cover the services provided in constructing these objects. A given unit produces just one of the two forms of output in a given production process (in division 53 if on own account, in division 54 if provided as a service). The valuation of the output will be different, according to the type of output produced.

The categories in division 54 that relate to the construction of complete objects follow the same structure as categories in division 53. Division 54 also covers additional outputs that are only produced on a service basis (special trades).

923 Secondary education services

This group includes:

- educational services for secondary programmes that become increasingly specialized as a student moves from one level to the next. These programmes can be general or technical/vocational according to the following definitions:
- General education is defined as education designed to develop learners' general knowledge, skills and competencies, as well as literacy and numeracy skills, often to prepare participants for more advanced education programmes at the same or a higher ISCED level and to lay the foundation for lifelong learning. These programmes are typically school- or college-based. General education includes education programmes that are designed to prepare participants for entry into vocational education but do not prepare for employment in a particular occupation, trade or class of occupations or trades, nor lead directly to a labour market-relevant qualification.
- Vocational education is defined as education programmes that are designed for learners to acquire the knowledge, skills and competencies specific to a particular occupation, trade, or class of occupations or trades. Such programmes may have work-based components (e.g. apprenticeships, dual-system education programmes). Successful completion of such programmes leads to labour market-relevant, vocational qualifications acknowledged as occupationally-oriented by the relevant national authorities and/or the labour market.

92310 Lower secondary education services, general

This subclass includes:

- Programmes at ISCED level 2, or lower secondary education, are typically designed to build on the learning outcomes from ISCED level 1.
